

# Rollarit

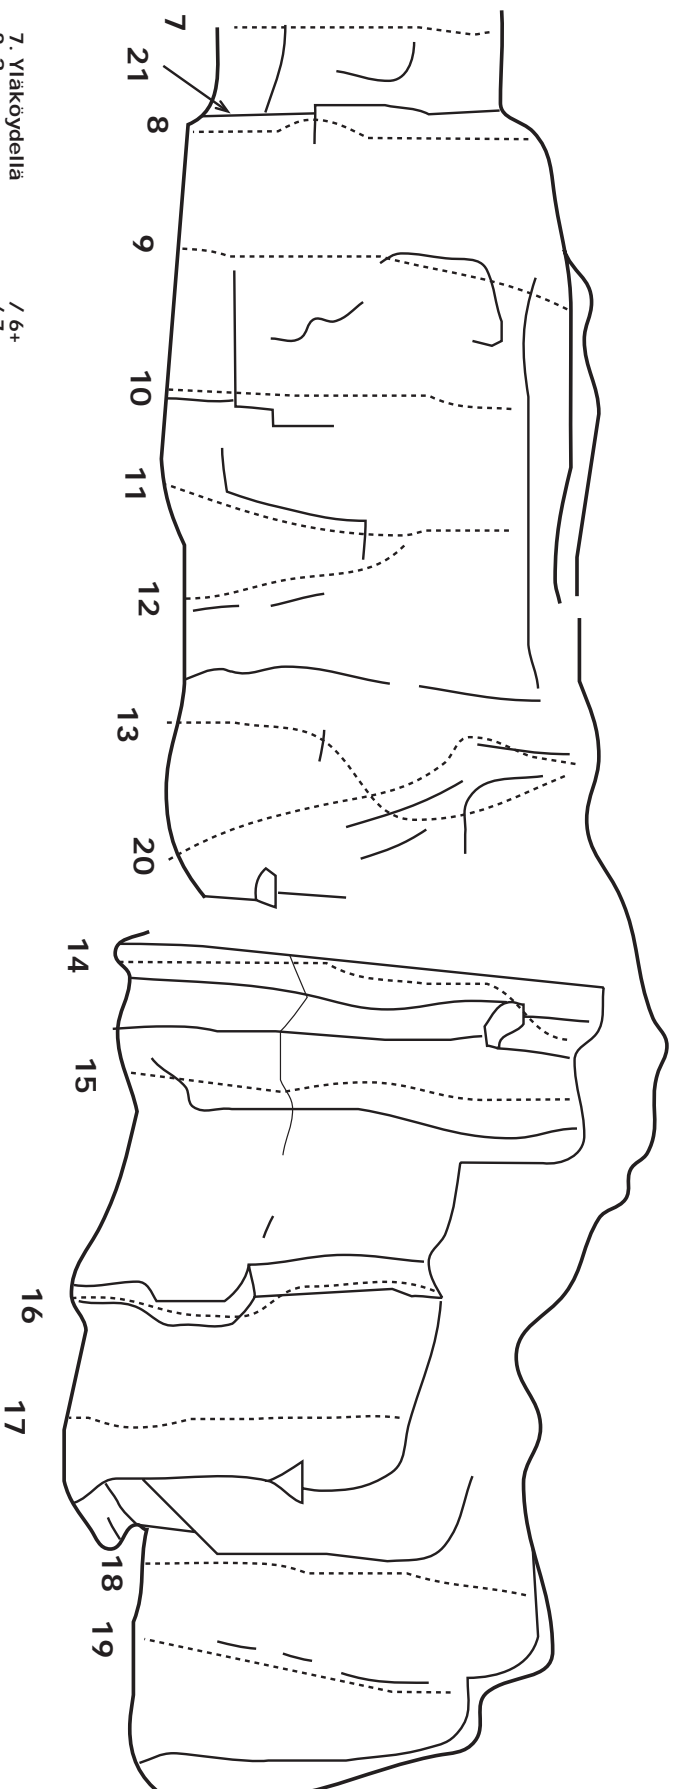

Height: 7 to 12 meters. Grades from 4 to 6c (French scale). Rollarit is a very popular crag, though since it is located in the shadow it takes long before the crag is dry.

Location and Approach:

Rollarit is situated at Eastern Helsinki. From "Itäväyle", turn north to "Kehe III" and drive about 0.7 km. If you drive too far, there is soon a field on your right. The crag is on the right (east) side of the road.
